

Critical Studies

GL International is delighted to sponsor a series of summer programs focusing on food systems and sustainability. These critical fields are of interest not only to students of Vietnam but to anyone interested in human health and environment. By focusing on similar issues in Vietnam, Italy, and Japan we give students the opportunity to experience, in consecutive programs, three of the world's great food cultures and the challenges facing them.

Vietnam

Vietnam is an extraordinary country, filled with a remarkable history and culture, and a visual feast for the eyes. This program makes extensive use of the whole country as a site. Students will encounter and visit more of the country and its features than most travelers, and certainly more than most Vietnamese.

We will study at museums, historic and religious sites, markets, restaurants, and farms as part of regular site visits.

Students will learn sufficient Vietnamese to travel independently and to converse on food related topics. We will interview experts in the Vietnamese food industry, from growers to chefs, as well as experts on the crisis of rice production, food security, and food quality. All site visits are in support of the courses and include encouragement to practice Vietnamese conversation.

Responding to the Challenges of
Our Health, Our Planet, Our World

Exploring Food Cultures

Gustolab® International

* Spring and Fall programs as well as
Research Internships also available in Italy.

Duration

4-weeks
